

Home Products Certification by NSF International

In the frenzied retail market space, consumers are looking for brands they can trust and NSF International's Home Product Certification is your tool in building consumer confidence.

NSF has been testing and certifying products to protect public health and safety since 1944. Their certification program helps retailers and manufacturers independently demonstrate that their products meet safety and performance requirements that have been developed on industry and regulatory consensus.

NSF's expertise, transparency, and broad range of services make them the premier resource for moving products to shelf faster. For more information, please contact NSF at homeproducts@nsf.org. You can also visit them at www.nsfhomeproducts.org.

Benefits of NSF Home Product Certification Include:

- Brand protection
- Faster speed to market
- Eliminates the need for individual retailer product testing
- Third party validation to assure quality, safety and performance
- Single resource for regulatory compliance
- Use of the internationally recognized NSF "Certified for Home Use" mark on products
- Product Listing on NSF's public, online directory

Eligible Products

Food storage containers, coffee makers, blenders, slow cookers and rice makers, stovetop cookware, tableware, oven bakeware, personal beverage containers, servingware, flatware and cutlery, food contact utensils, vacuum sealers and bags, corded home textiles, toasters and toaster ovens, clothes irons and steamers, fans, barware and accessories, space heaters.

NSF certifies a wide range of products, so if you don't see your product in the list above, please contact them at homeproducts@nsf.org.

Identifying Certified Products

Products that have been certified to the NSF Home Product Certification program can be found in the [NSF listings](#) and are allowed to use the NSF "Certified for Home Use" mark.

Certification Process

NSF uses a straightforward yet comprehensive certification process that offers assurance to retailers and quick turnaround times to manufacturers. Their dedicated project managers will work with you to guide your product certification from start to finish.
